

Ultra-High Power SLT & Burn-In Platforms Built for What's Next

Whether you're accelerating R&D or scaling up for high-volume production, our burn-in platforms are purpose-built to adapt—delivering dependable power where it matters and precision control when it counts.

Delivered

High-Efficiency Thermal Management

Designed for high-power and high-voltage devices up to 4kW per DUT with patented thermal control for tight regulation and repeatability.

Automation-Ready for Volume

Minimize cost tray-in/tray-out and binning, —all designed for seamless in-line operations.

Tailored Test Platforms

Configurable to suit your process, production scale, and supports sockets with individually replaceable pin.

Smart Monitoring & Scalable Control

Real-time voltage, current, and temperature feedback with multi-level programmability—scalable for future growth.

Power. Precision. Performance.
